Make your own Mr. Jefferson PAPER kaleidocycle

Step 1. Print on light cardstock paper (180 to 200 g).
Step 2. Score all vertical and diagonal lines for easier folding afterwards.
Step 3. Cut out along the lines.
Step 4. Fold all previously scored lines.
Step 5. Find the ends (hills) that will be glued onto the "glue" part. Tape or glue sides together. It is easier using double sided tape for the insides. That's it! Time to PLAY!
